

Welcome!

My staff and I are delighted that you have chosen our office to care for your child's dental needs.

Our mission is to care for your child with compassion and respect, promote sound teeth and a healthy lifestyle. We are proud to provide a relaxing, child friendly environment, specifically designed to engage your child, and our open door policy invites parents to accompany their children into the treatment areas.

Our goal is for your child to have a positive dental experience. We offer a variety of treatment options to help alleviate any anxiety your child may feel, including nitrous oxide (laughing gas), as well as treatment under general anesthesia in a comfortable setting. Our friendly and expert staff is great with children, adding to the caring and nurturing atmosphere of our office.

We accept and file most insurance as a courtesy and convenience to you. Financing is also available with approved credit.

We are happy to welcome your child as a new patient and hope to help him or her to maintain a beautiful, healthy smile for a lifetime.

Sincerely,

Karen M. Sept, DMD
